

SilverDaler

The Future of Digital Currency

What is SilverDaler?

SilverDaler is a revolutionary digital currency that combines cutting-edge technology with tangible, real-world value. Unlike fiat currencies, which are backed by mere good faith and trust, SilverDaler is backed by staked tangible goods such as silver, gold, cars, and other valuable assets. This ensures unparalleled stability and security.

Key Features

Proof of Value (PoV)

- Staking System: Unlike Bitcoin's "proof of work" or Ethereum's "proof of stake," SilverDaler uses a novel "proof of value" system. The value of each SilverDaler is

directly tied to the market price of staked tangible goods, ensuring its stability even in volatile markets.

Living Jurisdiction

- Only for Living Human Beings: SilverDaler operates within a unique legal framework where only living human beings can own and trade it. This eliminates fraud and misuse.

Dual Accounts System

- Native Account: Easily stake and manage your SilverDalers using the native account.
- External Account: Seamlessly integrate with traditional payment systems like MasterCard/Visa, Swish, or TapApps, allowing you to use multiple currencies (fiat and crypto).

Bridges to Traditional Systems

- Trusts and Companies: Transactions are facilitated through neutral and confidential trusts and companies, ensuring your privacy while bridging the gap between SilverDaler and traditional financial systems.

Insurance Protection

- Secure Investments: Partner with trusted insurance providers to safeguard your staked goods, providing peace of mind for valuable assets.

Why Choose SilverDaler?

- Stability: Unlike fiat currencies prone to inflation and instability, SilverDaler's value is tied to real-world assets.

- Security:** The "proof of value" system ensures that the currency remains stable even in volatile markets, protecting your investments.
- Privacy:** Transactions are conducted without the need for personal identification, offering enhanced privacy and security.
- Flexibility:** Use SilverDaler within the Living Nation framework while seamlessly integrating with traditional financial systems through dual accounts.
- Sustainability:** By backing the currency with tangible goods, SilverDaler promotes responsible resource management and sustainability.

How to Use SilverDaler

Purchase SilverDaler:

- App/Web Service:** Use the exchange function within the app or web service.
- Trade System:** Engage in peer-to-peer transactions without any fees.
- Off-Line Transfer:** Utilize mobile-to-mobile functions for cash or goods transfers.

Stake Your SilverDaler:

- Native Staking:** Stake your Dalers through the native account, selecting the amount and duration to maximize returns.
- External Staking:** Stake valuable tangible assets like gold, cars, or real estate. Ensure proof of ownership and independent confirmation.

Manage Your Accounts:

- Dual Account System:** Use the native account for SilverDaler transactions and the external account for traditional payments and investments.

1.Take Advantage of Bridges:

- Utilize trusts and companies to seamlessly integrate your SilverDaler transactions with traditional financial systems, maintaining privacy and security.

Benefits at a Glance

- Stability: Real-world asset backing ensures consistent value.
 - Privacy: Transactions are conducted without personal identification.
 - Flexibility: Seamlessly integrate with both digital and traditional financial systems.
 - Security: Enhanced protection through insurance and staking mechanisms.
 - Sustainability: Promotes responsible resource management.
