

IMySelf.Me

You are the Key

Secure Your Identity with Our ID, Account, and Wallet Key Ring

Welcome to a New Era of Digital Security and Convenience

In today's fast-paced world, securing your identity and managing your digital assets has never been more crucial. Our cutting-edge ID, account, and wallet key ring offer you unparalleled security, convenience, and control over your digital life.

Emotion Pin Function

Secure Authentication: Login or sign documents by showing five specific emotions to the camera.

Biometric Recognition: Our advanced emotion recognition technology ensures that only you can access your account.

Crypto Key Management

Safe Storage: Securely store and manage your API keys, crypto wallet keys, and other sensitive digital credentials with your self as the key.

Easy Access: Retrieve and use your stored keys with just a few clicks or taps.

Dual Account System

Native Account: Easily manage your personal data, transactions, and access control from one secure location.

External Wallet: Seamlessly integrate with traditional systems like MasterCard/Visa, Swish, TapApps (as Google Wallet), etc., allowing you to use multiple currencies (fiat and crypto) in a familiar manner.

Privacy and Security

No Personal Identification Needed: Use your ID without the need for a passport, ID-card, driver's license, or even your name.

Advanced Encryption: Your data is encrypted using state-of-the-art security protocols to protect against unauthorized access.

Seamless Integration with Traditional Systems

Bridges to Old Systems: Utilize neutral and confidential trusts and companies to bridge the gap between our digital system and traditional financial systems.

Transparency: Your transactions appear normal from the old system without using your name or ID, ensuring complete privacy.

User Control and Responsibility

Human Oversight: While you are the account holder and have full control over your resources, you remain humanly responsible for your actions.

Scam Prevention: Our system ensures that all transactions are legitimate, protecting you from money laundering and other fraudulent activities.

Why Choose Our ID, Account, and Wallet Key Ring?

Security: With emotion-based authentication and advanced encryption, your identity and digital assets are protected like never before.

Convenience: Easily manage multiple accounts, currencies, and keys without the hassle of remembering complex passwords or carrying physical cards.

Privacy: Enjoy complete privacy by using our system without revealing personal identification details.

Flexibility: Seamlessly integrate with both digital and traditional financial systems to enjoy full control over your finances.

How It Works

Set Up Your ID

Emotion Pin Setup: Calibrate the emotion recognition system by showing five specific emotions to the camera.

Secure Enrolment: Complete your enrolment process using our secure, user-friendly interface.

Manage Your Accounts

Native Account: Access and manage your personal data, transactions, and access control from one central location.

External Wallet: Utilize MasterCard/Visa, Swish, TapApps (as Google Wallet), or any other digital wallet for seamless integration with traditional systems.

Secure Your Keys

Crypto Key Management: Store your API keys, crypto wallet keys, and other sensitive credentials securely.

Retrieve Keys: Access your stored keys easily when needed.

Transact Securely

Bridges to Old Systems: Use trusts and companies to bridge the gap between our digital system and traditional financial systems.

Privacy Protection: Maintain complete privacy while conducting transactions, ensuring that they appear normal from the old system without using your name or ID.

Benefits at a Glance

Security: Emotion-based authentication ensures only you can access your account.

Convenience: Easily manage multiple accounts and keys with just a few taps.

Privacy: Enjoy complete privacy by using our system without revealing personal identification details.

Flexibility: Seamlessly integrate with both digital and traditional financial systems.
